

The Founder Canvas.

Everyone canvases the idea. This one canvases the founder.

v0.9

The mission

Why you, why this, why now?

The problem you are unreasonably qualified to solve · what you know that others don't · why the timing works

1

THE PEOPLE

THE MACHINE

THE PATH

Founders & equity

Who's building this, and who owns what?

Roles & decision rights · skill gaps · the split, vesting & cliff · the hard conversation, had or dodged

2

The company

Would you survive due diligence?

Entity & jurisdiction · who owns the IP, actually · founder agreements · the boring paperwork that kills deals

4

The wedge

What's the smallest thing you'll build?

The slice that tests the riskiest assumption · build, buy or no-code · who builds it · weeks, not months

7

Skin in the game

What are you actually risking?

Personal runway in months · hours per week, honestly · what's at stake at home · your walk-away line

3

Money in

Where does the fuel come from?

Bootstrap, angels or pre-seed · how much, from whom, by when · what the raise buys · plan B

5

Proof

What does the evidence say so far?

Demand signals to date · the riskiest assumption standing · the next cheapest test · what 'validated' means

8

The bench

Who fills the gaps you can't?

Advisors who've done it · first hires & when · fractional & outsourced pieces · lawyers, accountants, mentors

10

Money out

When do you hit zero?

Monthly burn · the zero date · the three things worth spending on · the ten that can wait

6

First customers

Who are the first ten, by name?

The specific person with the problem · where they gather · the motion that reaches them · the anti-customer

9

Milestones

What must be true in 90 days? In 12 months?

The next fundable milestone · 90-day commitments, each owned by a named founder · the 12-month picture an investor would back

11

Kill criteria

What would tell you to stop?

The signals that mean pivot or stop · the date you'll review them · who holds you to it

12
